**cephalothorax** 

**eyes** 

### Spider Parts

Spider Parts

legs

pedipalps

eyes

cephalothorax

spinnerets

abdomen

### Spider Legs

Spiders have eight legs. Each leg is divided into several segments. Spiders have many knees!

Spiders have special tiny claws on the ends of their legs. These claws help them walk on their sticky webs.

### Spider Webs

Spiders build webs out of silk that they make in their bodies. They use their webs to catch their prey. Some of the parts of a spider web are sticky. Spiders walk carefully on the parts that aren't sticky. Insects get caught in the sticky parts.

**prey**  
Prey is an animal that is hunted and killed by another for food. Most spiders catch and eat insects.

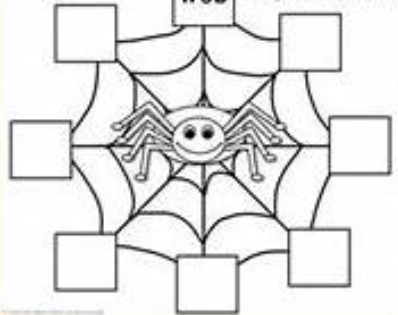

This type of web is called a funnel web.

Spiders also use their silk to make cocoons. They make long silken tubes to protect their eggs.

### Word Web

Name: \_\_\_\_\_

Read the words. Find the words that have the same middle sound as web. Cut and glue them into the boxes.
